

## QGIS Application - Bug report #13395

### Load style from database

2015-09-22 04:11 AM - Kristyna Maresova

<b>Status:</b>	Closed	
<b>Priority:</b>	High	
<b>Assignee:</b>		
<b>Category:</b>	Symbology	
<b>Affected QGIS version:</b>	2.10.1	<b>Regression?:</b> No
<b>Operating System:</b>	Windows	<b>Easy fix?:</b> No
<b>Pull Request or Patch supplied:</b>	No	<b>Resolution:</b> worksforme
<b>Crashes QGIS or corrupts data:</b>	No	<b>Copied to github as #:</b> 21447
<b>Description</b>		
<p>When I save the style to postgres database in QGIS, it automatically saves the style in the table layer_styles in public scheme.</p> <p>But when I want to reconnect it to the layer, it shows only all other layer styles without required one and in the window 'styles related to the layer' there is a message "No styles found in the database". Maybe there is a problem with connecting to the table's name.</p> <p>Just for info: When I change the name of the table (f_table_name) manually in PGAdmin, the style can be opened from window 'other styles on the database'.</p>		

### History

Can you please post a list of steps to reproduce the issue?

I wasn't able to reproduce the issue when I tried with today's OSGeo4W nightly.

*I wasn't able to reproduce the issue when I tried with today's OSGeo4W nightly.*

(1)I loaded layer from PostGIS database, (2) then I styled the layer, (3) saved it into the database(4)and make it default) and then (5)removed the layer from project. (6) When I loaded the layer again from database, the required style doesn't appear in the window 'styles related to this table'.

When I open different layer, the style for previous layer appears in window 'other styles on database'. Now I am working with todays OsGeo4W and it still doesn't work for me.

Same problem here using QGIS 2.12 on Windows.

**#5 - 2015-12-19 01:52 PM - Giovanni Manghi**

just tested on 2.12 on Win7 and QGIS master, and it works as expected.
