Does that happen for any polygon for you? Works fine for me, but the polygon doesn't look like the one from the video.

Yes. My own files but also polygon files used at a training. I used the same set of files as the trainer who had Wien while I was using Pisa. Worked as expected for her not for me.

Checked again with another polygon file I found, on windows7, 64b with Pisa (2.10.1) QGIS code revision d20c5b7 and with 2.11.0-master QGIS code revision 3dcabfb
