QGIS Application - Bug report #13428
PyQt not aware of qgis_customwidgets.py

2015-09-26 12:06 AM - Lauri Kajan

Status:	Closed			
Priority:	Normal			
Assignee:	Denis Rouzaud			
Category:	Build/Install			
Affected QGIS version:	master	**Regression?:**	No	
Operating System:	windows / osgeo4w	**Easy fix?:**	No	
Pull Request or Patch supplied:	No	**Resolution:**		
Crashes QGIS or corrupts data:	No	**Copied to github as #:**	21475	

Description

On osgeo4w installation compiling ui files with pyuic4 produces wrong imports for qgis custom widgets.
Also all the plugins are affected that try to use ui-files directly with uic.loadUiType(). Plugins crash in this situation.

This is because of PyQt is not aware of qgis_customwidgets.py located in qgis\\python\\PyQt4\\uic\\widget-plugins folder.
In the qgis_customwidgets.py it is commented that the file should be copied into /pythonX/dist-packages/PyQt4/uic/widget-plugins/ but it is not.

This is discussed in https://lists.osgeo.org/pipermail/qgis-developer/2015-September/039196.html
