Affected QGIS version:	master	**Regression?:**	No
Operating System:		**Easy fix?:**	No
Pull Request or Patch supplied:	No	**Resolution:**	
Crashes QGIS or corrupts data:	No	**Copied to github as #:**	21487

Description

Hi!
I'm on win 7sp1 x64, OSGeo4W64 - qgis-dev-2.11, QGIS code revision 6a6adc9. In some situations (moving common vertices of two features-> active is "Enable topological editing") when I use "Node tool" and try to move selected vertex it just add new vertex, you can see what I mean on film (it's better to download movie file and watch directly on computer, than through dropbox player, the mp4 file has than better resolution):

https://www.dropbox.com/s/6tiwedihce3teoc/clip.mp4?dl=0

The last qgis version 2.11.0-Master in which "Node tool" works great is - QGIS code revision - f3c7d85, it was released 11 sept. 2015, all versions later have worse "working mode" of "Node tool".
