Pull Request or	Patch supplied:	Resolution:
Easy fix?:	No	Copied to github as #: 21492
Description		
Please, see attac	hed image to understand the thre	ead:
A - definition of th	resholds for the color legend	
B - visualisation of	f color legend in TOC	
C - example what	I am capable to construct via leg	gend properties to map composer
My wish:		
•	pradient with correct position of v	alues (see offset next to the interval threshold), no outline forthe interval colors
	transformed to horizontal positio	
	•	
	w much work it is to implement fe	eatures for creating such legend, but that would be really helpful.
I do not know, how		
	s kinds of gridded data for 15+ y	ears on daily basis; E option would cover 90% of my needs for legend. It is logically
