

QGIS Application - Bug report #13473  
oracle show 0 when asked for 'show feature count' in layer list

2015-10-01 02:31 AM - Richard Duivenvoorde

<b>Status:</b>	Closed		
<b>Priority:</b>	Normal		
<b>Assignee:</b>	Jürgen Fischer

<b>Description</b>			
see title and screenshot			
I loaded a shp file with 354 features in oracle via ogr2ogr			
Loaded both the shp and the table in oracle, and in the layer manager/list asked 'Show feature count' in context menu.			
As you can see it shows zero, BUT the features are ok and visible...

Are you using estimated metadata data and is the table analyzed? Otherwise Oracle claims that the number of rows is 0.

If

```
SELECT num_rows FROM all_tables WHERE owner='SOMEONE' AND table_name='SOMETABLE';
```

returns 0, although the table isn't empty it should change after running

```
ANALYZE TABLE sometable COMPUTE STATISTICS;
```

If you get ORA-38029 you should run

```
exec DBMS_STATS.UNLOCK_TABLE_STATS('SOMEUSER','SOMETABLE');
```

first.
