

QGIS Application - Bug report #13484

Processing's "Random points inside polygons (fixed)" has silent limit

2015-10-01 11:01 AM - Johannes Kroeger

<b>Status:</b>	Closed	
<b>Priority:</b>	Normal	
<b>Assignee:</b>	Victor Olaya	
<b>Category:</b>	Processing/Core	
<b>Affected QGIS version:</b>	master	<b>Regression?:</b> No
<b>Operating System:</b>		<b>Easy fix?:</b> No
<b>Pull Request or Patch supplied:</b>	No	<b>Resolution:</b>
<b>Crashes QGIS or corrupts data:</b>	No	<b>Copied to github as #:</b> 21529
<b>Description</b>		
<p>Processing's "Random points inside polygons (fixed)" says "Missing parameter value: Number or density of points" if "Number or density of points" is set to more than 9999999. It works with 9999999 but not with 10000000.</p> <p>I am on 2affb27.</p>
