

QGIS Application - Bug report #13533

[video] Qgis Style cause line to become longer when i resize the panel

2015-10-06 05:01 AM - baditaflorin -

Status:	Closed	
Priority:	Normal	
Assignee:		
Category:		
Affected QGIS version:	master	Regression?: No
Operating System:		Easy fix?: No
Pull Request or Patch supplied:	No	Resolution:
Crashes QGIS or corrupts data:	No	Copied to github as #: 21575
Description		
<p>This is so weird and specific that i had to record the screen to show the bug. The link is here</p> <p>http://youtu.be/Owd2R94anq0</p> <p>I was thinking that is related with the fact that i loaded from a database, but is not.</p> <p>I had pinpointed the bug to when you attribute a style coloring to a layer.</p> <p>I had put it as high because this is in the master , and Qgis 2.12 will ship in 3 weeks, and the Style function it is used by almost everybody, so shipping with such a bug would not be a good idea</p>		

History

#1 - 2015-10-06 06:02 AM - baditaflorin -

Tested with another Qgis 2.11 master fefd85a and i don't see thid error

#2 - 2015-10-06 11:40 AM - Saber Razmjooei

- Priority changed from High to Normal
- Status changed from Open to Feedback

I can't reproduce with 935dca0.

#3 - 2015-10-06 11:49 AM - Salvatore Larosa

- Status changed from Feedback to Closed

the QGIS revision (16d7a06) you are using is too old, anyway that was a problem which was fixed in master.
Please test with more recent revision and reopen if necessary, thanks!
