Easy fix?: No	Copied to github as #: 21576
Description	
<p>Hi all!</p> <p>Take a vector layer with attributes who are calculated by QGIS (UUID, current date/time... but not virtual field!). If you make an entry form by clic-n-drag and you don't add these fields, they are not calculated.</p> <p>For example, it would be nice to automatically save the entry date without showing it at the user. This way, he could not change it by mistake.</p> <p>Thanks ;-)</p>
