Description

Clicking the Apply button doesn't update the labels on the map when using the Layer Labelling Settings dialogue. However, when using the Labels tab in the Layer Properties the Apply button works.

Confirmed here. Should be marked as blocker for 2.12, it's a regression, and a very usefull feature in every day's workflow since labeling is an iterative task.

Can you post some steps to reproduce? I still can't trigger this issue

#5 - 2015-10-14 10:05 AM - Frank Sokolic

1. Make a layer active in the layers panel
2. Click the *Layer Labelling Options* icon on the toolbar (or *Layer > Labelling* from the menu bar)
3. Make changes to the label settings
4. Click **Apply**, labels don't get updated on the map canvas
5. Click **OK**, dialogue box closes and labels are updated

This is on Ubuntu 15.04 64 bit running QGIS master.

- Status changed from Feedback to Open

- Operating System deleted (Ubuntu)

- OS version deleted (15.04 64 bit)

I can confirm in debian jessie and Windows. It is indeed a regression.
