

QGIS Application - Bug report #13547

Symbol layer effects order not respected

2015-10-08 11:39 AM - Matthias Kuhn

Status:	Closed	
Priority:	Normal	
Assignee:	Nyall Dawson	
Category:	Symbology	
Affected QGIS version:	master	Regression?: No
Operating System:		Easy fix?: No
Pull Request or Patch supplied:	No	Resolution: end of life
Crashes QGIS or corrupts data:	No	Copied to github as #: 21589
Description		
When setting up a layer with two symbol layers and activating an effect on the underlying symbol it is not hidden behind the upper layer. The attached images show the effect. The border should be on top of the inner glow and its color should not be affected. Don't blame me on the horrible map style ;)		

History
