

QGIS Application - Feature request #13560

User should define a default composition page size

2015-10-10 05:47 AM - Harrissou Santanna

Status:	Open	Resolution: Copied to github as #: 21602
Priority:	Normal	
Assignee:		
Category:	Map Composer/Printing	
Pull Request or Patch supplied:		
Easy fix?:	No	
Description		
<p>Hi,</p> <p>In print composer, I often use A3 landscape paper and the default page i have is A4 landscape.</p> <p>It'd be nice if new print composer could be created with a customized size page. This values could be saved in settings (last used) or defined by the user in Settings menu > Options > Composer.</p>
