<b>Crashes QGIS or corrupts data:</b>	No	<b>Copied to github as #:</b> 21615
<b>Description</b>		
Steps: Add a scale bar in a print composer. In its properties, Display > Alignment, whatever option you choose nothing happens.  master 15af5a1		

#### History

##### #1 - 2015-10-12 03:51 AM - Harrissou Santanna

If the style chosen for the scale bar is "numeric" then the alignment works.

Since this option is active for the other styles, it should align the text with the border of the segments.

- *Easy fix? set to No*

- *Regression? set to No*

##### #3 - 2017-11-21 02:31 AM - Nyall Dawson

- *Resolution set to fixed/implemented*

- *Status changed from Open to Closed*

- *Description updated*

Fixed in 3.0 - the alignment option is disabled for non-numeric scale bars.

The correct way to lock the reference position of items during resizing is to set the item's reference point - this works correctly for scalebars in 2.x and 3.0.
