

QGIS Application - Bug report #13577

Impossible to choose current date in form with date widget

2015-10-12 07:16 AM - Amelie Mesnard

Status:	Closed	
Priority:	Normal	
Assignee:	Denis Rouzaud	
Category:	Forms	
Affected QGIS version:	master	Regression?: No
Operating System:		Easy fix?: No
Pull Request or Patch submitted:		Resolution: fixed/implemented
Crashes QGIS or corrupts data:		Copied to github as #: 21619
Description Hello, I'm working with Qgis 2.8 I define these options for a date field : <ul style="list-style-type: none">- editable- format : date and time- display : customized (dd/MM/yyyy), calendar and allow null values And with these options, in editing mode, I can't choose directly the current date. I had to choose an another day and then come back to the current day. I don't think that is a normal behavior. Thanks. A. Mesnard		

History

#1 - 2015-10-12 10:18 AM - Anita Graser

- Target version set to Future Release - Lower Priority
- Affected QGIS version changed from 2.8.1 to master

I can confirm this in 2.8.3 and master: the current date is highlighted when the calendar opens. Clicking on it does not write the date into the date field. Any other date can be selected just fine.

#2 - 2015-10-12 10:19 AM - Anita Graser

- Subject changed from Choose current date to Impossible to choose current date in form with date widget

#3 - 2017-05-01 01:06 AM - Giovanni Manghi

- Easy fix? set to No
- Regression? set to No

#4 - 2017-09-21 10:23 AM - Denis Rouzaud
