Description

If I give a layer a (external) legend URL and do GetCapabilities I get:

<Style>
<Name>default</Name>
<Title>default</Title>
<LegendURL>
<Format>image/png</Format>
<OnlineResource xmlns:xlink="http://www.w3.org/1999/xlink" xlink:type="simple"
xlink:href="http://www.osgeo.org/sites/all/themes/osgeo/logo.png"/>
</LegendURL>
</Style>

Which is correct. But when I do GetLegendGraphic I get a simple marker instead.
