

QGIS Application - Feature request #13605

Filter mapcomposer-legend to only show layers checked/visible on the map canvas

2015-10-15 02:24 AM - Filip Mahieu

Status:	Closed	
Priority:	High	
Assignee:		
Category:	Map Composer/Printing	
Pull Request or Patch supplied:	No	Resolution: duplicate
Easy fix?:	No	Copied to github as #: 21645
Description		
<p>In the table of contents you can uncheck certain layers. However, if you make a composer, and you add a legend, all the layers that are in the table of contents are displayed in the legend. It makes no difference if you have checked or unchecked them.</p> <p>Using the green button 'filter' does not change that behaviour. It still gives you all the layers.</p> <p>It would be logic and very nice to be able to just have in the legend those layers (in the Composer langed) that are used in the map canvas.</p> <p>Someone already made some Python-code to make that possible: http://gis.stackexchange.com/questions/120209/filter-mapcomposer-legend-to-only-show-layers-visible-on-the-map .</p> <p>Working on Qgis 2.8.3 .</p>

Isn't this a duplicate of #13575?

#2 - 2015-10-15 05:56 AM - Filip Mahieu

Yes, indeed, i scrolled along the issues concerning Map Composer, but I must have overlooked it. Thanks.
