

QGIS Application - Feature request #13613

Please do NOT add borders to bright colors in the Histogram

2015-10-15 02:01 PM - Johannes Kroeger

Pull Request or Patch supplied:		
Easy fix?:	No	
Description		
<p>The histogram seems to add borders to bars that are in light colors. I thought this was a bug until I tried to find out when it happened and when not.</p> <p>I find this questionable and would like it not to happen. The contrast to the background was more than enough in all cases I tried. In my opinion it should either leave the borders alone or use the same borders as defined in the actual style (if there are).</p> <p>This seems to be hardcoded, it does not seem to actually look at contrast, but some other metric. Also it does not work with different UI styles, like the new Night Mapping mode.</p> <p>I am ae1250b on Archlinux. And I absolutely love that it uses the style's colors!</p>
