Description

hitting Esc button closes most of the sub-dialogs in Layer Properties dialog. This doesn't work if you want to close the "query builder" dialog opened in General tab.

The *Escape* button works as expected, except when the focus is in the *provider specific filter expression* text box widget, which is the default when opening the dialog.

Since this widget also captures *Return* and *Tab* the dialog is hard if not impossible to use by keyboard alone.

@Harrissou Santanna:
On Windows you can use the shortcut **Alt-F4** to close the dialog.
