Paolo, was "area" a numeric column? If yes, probably string sorting is wrongly used here.

#2 - 2008-11-08 12:48 AM - Paolo Cavallini

Yes, it was numeric, whereas the order appears string-based.

I guess it might have to do with commas ("," is used for decimals in our locale, whereas grass tables show a ".")

#3 - 2008-11-08 12:51 AM - Markus Neteler

I do remember a similar bug in QGIS fixed 1-2 years ago. If the comma is the issue, then the data should be mapped to C Locale first, then sorted.

Can you try to run QGIS in English locale and see if it works?

#4 - 2008-11-08 01:10 AM - Paolo Cavallini

It is not working for double and real fields, even if LANG=C.

It appears a general problem, as it appears for shp layers too

#5 - 2008-11-08 07:08 AM - Marco Hugentobler

- Status changed from Open to Closed

- Resolution set to fixed

Fixed in

Marco
