QGIS Application - Feature request #13672

Field calculator output preview should use selected type

Easy fix?:	No	**Copied to github as #:**	21706

Description

The Field Calculator's "Output preview" should show the same format as using the currently selected "Output field type" would result in.

For example if "Output field type" is set to "Whole number (integer)" it should display a "7", not a "7.123456".

This would at least me make less accidental integer columns when I wanted decimals.
