

QGIS Application - Feature request #137

On-the-fly postgres simplify of geometries

2006-06-05 07:54 PM - Gavin Macaulay -

Status:	Closed	
Priority:	Low	
Assignee:	Gary Sherman	
Category:	Data Provider	
Pull Request or Patch supplied:		Resolution: fixed
Easy fix?:	No	Copied to github as #: 10196
Description		
It would be neat if qgis could do an on-the-fly postgis simplify of geometries based on map scale and user preferences. This would have the potential to significantly speed up drawing of postgis geometries.

Qgis has now a neat "simplify feature" edit tool, that works also on postgis layers. This answer to your ~~old~~ request?

#2 - 2009-07-19 02:11 AM - Giovanni Manghi

- Resolution set to fixed
- Status changed from Open to Closed

There is also the "simplify features" tool in ftools, so I guess that the request was fulfilled. Closing.

#3 - 2009-07-19 10:59 PM - Paolo Cavallini

This is not exactly what g_j_m was looking for IMHO. On-the-fly simplification can be obtained trough a view, with the [[PostGIS]] Manager: would this be enough?
