Cannot replicate here (ubuntu and windows): are you using the latest processing version on master? check if in .qgis2/python/plugins/ you have a "processing" folder, if yes delete it and restart qgis. Thanks.

Yes, I'm using the latest processing version on Master, Ubuntu 15.10 64 bit. I've deleted the *processing* folder from .qgis, then restarted QGIS but the problem still occurs.

Screen shot attached.

.qgis2, right?

Screen shot attached.

I'm basically on the same platform, see attached screenshot (works ok for me).
