

QGIS Application - Bug report #13818

Selecting multiple files in SAGA/Processing uses wrong separator

2015-11-12 10:59 AM - Guillaume Larocque

Status:	Closed	
Priority:	Normal	
Assignee:	Victor Olaya	
Category:	Processing/SAGA	
Affected QGIS version:	2.12.0	Regression?: No
Operating System:	Linux/Ubuntu	Easy fix?: No
Pull Request or Patch supplied:	No	Resolution: invalid
Crashes QGIS or corrupts data:	No	Copied to github as #: 21843
Description		
<p>"Processing>SAGA>Cluster Analysis for Grids" does not work when selecting more than one grid files. The attached error log indicates that the problem is with the import from the tif files. The command seems to use commas as separators between file paths. Executing that command with saga_cmd also fails, but replacing the commas with semi-colons fixes it.</p> <p>This is under Linux/Ubuntu. I haven't tested to see if it is also a problem on other platforms.</p>

What Processing version are you using?

#2 - 2015-11-12 01:16 PM - Guillaume Larocque

This is under QGIS 2.12.0. I'm using the version of Processing that comes with it...

do you have any "processing" folder inside .qgis2/python/plugins/ ?

#4 - 2015-11-13 03:08 AM - Victor Olaya

semicolons are already used, see here

<https://github.com/qgis/QGIS/blob/master/python/plugins/processing/algs/saga/SagaAlgorithm213.py#L105>

Looks like you are using an older version (or an older version in your system is shadowing the one that comes with QGIS 2.12)

yes, that's my guess.

#6 - 2015-11-13 02:01 PM - Guillaume Larocque

How does one re-install processing to make sure I have the newer version?

remove any "processing" folder inside .qgis2/python/plugins/

restart qgis, update Processing if a new version is available in the plugin manager.
