

QGIS Application - Bug report #13868

change transparency of all rules by right click crashes qgis

2015-11-24 05:32 AM - Regis Haubourg

Status:	Closed	
Priority:	Severe/Regression	
Assignee:		
Category:	Symbology	
Affected QGIS version:	2.12.0	Regression?: No
Operating System:		Easy fix?: No
Pull Request or Patch supplied:	No	Resolution:
Crashes QGIS or corrupts data:	Yes	Copied to github as #: 21891
Description		
<p>Hi, with rule based symbols on point layers, when trying to batch change transparency of rules, we got a crash.</p> <p>This area has seen crashes on almost every version of qgis and lots of regression. That would deserve unit tests.</p>		

History

#1 - 2015-11-24 01:49 PM - Matthias Kuhn

- Priority changed from High to Severe/Regression
- Status changed from Open to Feedback

I could not reproduce,

Select all rules, right click, change transparency, change value, click ok

#2 - 2015-11-24 01:55 PM - Sebastian Dietrich

I can not reproduce this either. Neither 2.12.0 nor master crashes.

- Could you please export the style you are trying to batch change and attach it here?
- To what value are you setting the transparency?
- Are you changing all rules or only a subset?
- Does this only happen when working with a certain layer? What kind of layer is this (shapefile, postgres, ...)?

#3 - 2015-11-25 12:49 AM - Regis Haubourg

- Status changed from Feedback to Closed

Hi, in fact crash did occur after having made a classification by categories, then switch to ruled based rendered. I couldn't reproduce again today.

Sorry for raising the issue so fast, it looked so much like recurrent crashes before...

I close the issue now. Régis
