QGIS Application - Bug report #13872
"build virtual vector": does not create a file extension

2015-11-24 08:55 AM - Armando Forlani

Status:	Closed			
Priority:	Normal			
Assignee:	Luigi Pirelli			
Category:	Processing/QGIS			
Affected QGIS version:	2.12.0	**Regression?:**	No	
Operating System:		**Easy fix?:**	No	
Pull Request or Patch supplied:		**Resolution:**	fixed/implemented	
Crashes QGIS or corrupts data:	No	**Copied to github as #:**	21895	

Description

QGIS geoalgorithms->Vector general tools->Build virtual vector
The tool does not create a file extension. Should there be one?

The raster equivalent of such tool (gdalbuildvrt) creates a VRT file. Should "build virtual vector" also have its file extension?

PS I noticed #12991. That bug should really be a high priority rather than a 'nice to have'. Is there a way of "up voting" a bug/feature request?

Associated revisions

Revision 917ea5c0 - 2016-01-12 07:24 PM - Alexander Bruy

[processing] add extension to the output vector VRT (fix #13872)
