QGIS Application - Bug report #1389
The config file (/grass/config/default.qgc) not found

2008-11-10 02:48 AM - arkygeek -

Status:	Closed		
Priority:	Low		
Assignee:	nobody -		
Category:	GRASS		
Affected QGIS version:		**Regression?:**	No
Operating System:	Debian	**Easy fix?:**	No
Pull Request or Patch supplied:		**Resolution:**	worksforme
Crashes QGIS or corrupts data:		**Copied to github as #:**	11449

Description

When not building to default location, this warning occurs. (I was trying to build to ~/apps) When I use ccmake and leave the option blank, everything starts to work again.

What warning?

#2 - 2009-01-14 09:43 AM - Paolo Cavallini

- Resolution set to worksforme

- Status changed from Open to Closed

I think this is a local problem on your machine.

I have recently downloaded qgis from git and compiled and I can confirm this behaviour on my computer too. When I try to open GRASS Tools, following warning appears:

The config file (/home/anna/dev/qgis/Quantum-GIS/grass/config/default.qgc) not found.

There is no Quantum-GIS/grass directory. What should I do with it?

Thanks
