QGIS Application - Feature request #13926
GPS Tools: add multiple GPX files to map

2015-12-01 09:37 AM - Joel Masselink

Pull Request or Patch supplied:	No	**Resolution:**	
Easy fix?:	No	**Copied to github as #:**	21944

Description

Using GPS Tools, GPX files must be selected one at a time to be added to the map. It would be helpful to have an option to add multiple files at once, and to indicate whether to add Waypoints, Routes, or Tracks (checkbox?).

Awesome work, QGIS developers! This feature request was implemented in 2.14 I believe. This makes a big difference to GPX layer management in QGIS desktop and I am very grateful!
