QGIS Application - Feature request #1395
Add / move vertex to given x/y-coordinate

2008-11-12 01:18 AM - Marco Hugentobler

Status:	Closed		
Priority:	Low		
Assignee:	nobody -		
Category:	Digitising		
Pull Request or Patch supplied:		**Resolution:**	fixed
Easy fix?:	No	**Copied to github as #:**	11455

Description

It would be cool to have the possibility to specify coordinates as text when adding or moving a vertex.

History

The "Numerical vertex edit" plugin does something similar for points. Maybe the idea can be reused to create such feature.

I think the plugin fulfills these needs. Please reopen if not.

not really.

AT the moment you digitize a point (or vertex) then you need to pick the plugin, select the point/vertex and change the coordinates. What is asked by many users is a tool/option that allows to **directy** digitize points/vertexs at a given coordinate.
