Description

When I click on the Open File button in the editor dialog in the Python console, QGIS fails to open the file browser and gives the following error:

@> An error has occurred while executing Python code:

```
TypeError: QFileDialog.getOpenFileNames(QWidget parent=None, QString caption=QString(), QString directory=QString(), QString filter=QString(), QString selectedFilter=None, QFileDialog.Options options=0): argument 3 has unexpected type 'QDir'
Traceback (most recent call last):

Python version: 2.7.9 (default, Mar 1 2015, 13:01:26) [GCC 4.9.2]
