

QGIS Application - Feature request #13989

Install / Build / Setup

2015-12-15 02:53 AM - Dietmar Berthold

Status:	Open	Resolution: Copied to github as #: 22003
Priority:	Normal	
Assignee:		
Category:	Build/Install	
Pull Request or Patch supplied:	Not supplied	
Easy fix?:	No	
Description		
<p>Installing QGIS (under Windows OS) is very very time-consuming because of the huge amount of small files to be unpacked/copied. Each installation is a full installation. There is a need for a customizable setup. Not each user needs a full QGIS for his work, some users only want to open existing QGIS projects and simply navigate in the map. For these users it is not necessary to install all of the complex functionality, tools, button bars, extensions etc. This way, one could reduce the time needed for the setup and the GUI will become more clear (customizing the GUI after installation can be omitted).</p>

If you install from OSGeo4W you have more choices.

#2 - 2015-12-15 03:01 AM - Jürgen Fischer

- *Operating System set to Windows*
- *Category set to Build/Install*

#3 - 2017-05-01 12:46 AM - Giovanni Manghi

- *Easy fix? set to No*
