

QGIS Application - Bug report #14005

composer: qgis freezes when pasting a map legend item

2015-12-18 02:33 AM - Mathieu Pellerin - nIRV

Status:	Closed	
Priority:	High	
Assignee:		
Category:	Map Composer/Printing	
Affected QGIS version:	master	Regression?: No
Operating System:	Ubuntu 14.04 LTS	Easy fix?: No
Pull Request or Patch applied:		Resolution: not reproducible
Crashes QGIS or corrupts data:	Yes	Copied to github as #: 22018
Description		
Since 2.12, pasting a map legend item onto a new composer window freezes QGIS, and the only way to get it unfreezed is to kill it. The gdb trace is as follow: <pre>#0 0x00007ffff63999c9 in QHash<QString, QgsExpressionContextScope::StaticVariable>::createNode (this=0xc22dad8, ah=37064350, akey=..., avalue=..., anextNode=0x2148d78) at /usr/include/qt4/QtCore/qhash.h:548 #1 0x00007ffff63985bf in QHash<QString, QgsExpressionContextScope::StaticVariable>::insert (this=0xc22dad8, akey=..., avalue=...) at /usr/include/qt4/QtCore/qhash.h:763 #2 0x00007ffff638ff97 in QgsExpressionContextScope::addVariable (this=0xc22dad0, variable=...) at /home/webmaster/dev/cpp/QGIS/src/core/qgsexpressioncontext.cpp:92 #3 0x00007ffff6391f24 in QgsExpressionContextUtils::globalScope () at /home/webmaster/dev/cpp/QGIS/src/core/qgsexpressioncontext.cpp:460 #4 0x00007ffff66369ab in QgsComposition::createExpressionContext (this=0xb1c1ca0) at /home/webmaster/dev/cpp/QGIS/src/core/composer/qgscomposition.cpp:3427 #5 0x00007ffff6587b84 in QgsComposerObject::createExpressionContext (this=0xbca3090) at /home/webmaster/dev/cpp/QGIS/src/core/composer/qgscomposerobject.cpp:201 #6 0x00007ffff65c7dea in QgsComposerMapGrid::createExpressionContext (this=0xbca3090) at /home/webmaster/dev/cpp/QGIS/src/core/composer/qgscomposermapgrid.cpp:2240 #7 0x00007ffff65bfb8f in QgsComposerMapGrid::draw (this=0xbca3090, p=0x7fffffb0b0) at /home/webmaster/dev/cpp/QGIS/src/core/composer/qgscomposermapgrid.cpp:677 #8 0x00007ffff65b77d7 in QgsComposerMapItemStack::drawItems (this=0xbc53480, painter=0x7fffffb0b0) at /home/webmaster/dev/cpp/QGIS/src/core/composer/qgscomposermapitem.cpp:200 #9 0x00007ffff65a9230 in QgsComposerMap::paint (this=0xbca03f0, painter=0x7fffffb0b0, itemStyle=0xb215c88, pWidget=0x89b3870) at /home/webmaster/dev/cpp/QGIS/src/core/composer/qgscomposermap.cpp:422 #10 0x00007ffff5619deb in ?? It's <i>not</i> happening with all map items, I've been able to replicate this issue with one project, unfortunately I can't figure out a way to reduce the project to a size that can be shared.
