

QGIS Application - Bug report #1402

Open attribute table hangs when a ShapeFile layer has unsaved changes

2008-11-14 01:36 AM - zachariahwyder -

Status:	Closed	
Priority:	Low	
Assignee:	nobody -	
Category:	Vectors	
Affected QGIS version:		Regression?: No
Operating System:	Windows	Easy fix?: No
Pull Request or Patch supplied:		Resolution: worksforme
Crashes QGIS or corrupts data:		Copied to github as #: 11462
Description		
<p>To reproduce:</p> <p>Won't produce error:</p> <ol style="list-style-type: none">Simply open the attributes table window on a [[ShapeFile]] layer <p>Will produce error:</p> <ol style="list-style-type: none">Change the layer to editableAdd a new pointOpen the attributes table <p>The memory usage will then increase about about 1G (in my test example). Of course this then causes the system to run slowly if you don't have that much memory!</p> <p>This seems very similar to #1198, however there is no [[PostGIS]] involved. Are they related?</p> <p>I notice there are two memory leak fixes that involved [[PostGIS]] NULL values, but again, this doesn't involve [[PostGIS]]. r8217, r6391</p>		

History

#1 - 2008-11-14 02:10 AM - zachariahwyder -

There was also no copying involved in producing this error.

#2 - 2009-01-04 08:15 PM - christop -

This bug also appears with:

- 0.11.0-Metis built against code revision 9842
- on Debian lenny 64 bits.

#3 - 2009-01-07 11:17 AM - Maciej Sieczka -

Please test with 1.0 preview release from QGIS download page and report back here.

#4 - 2009-01-18 11:30 PM - zachariahwyder -

- Resolution set to worksforme
- Status changed from Open to Closed

Thanks! It works in 1.0.0-Kore-preview1.

#5 - 2009-08-22 01:01 AM - Anonymous

Milestone Version 1.0.1 deleted
