

QGIS Application - Bug report #14057

\$area bogus value

2016-01-05 09:03 AM - Marina Mautner

Status:	Closed	
Priority:	Normal	
Assignee:		
Category:		
Affected QGIS version:	2.10.1	Regression?: No
Operating System:		Easy fix?: No
Pull Request or Patch supplied:	No	Resolution: duplicate
Crashes QGIS or corrupts data:	No	Copied to github as #: 22067
Description		
<p>I created a snip file using two separate shape files. The resulting layer has approximately 12,000 features. When using \$area and in the Derived values information (for less than 10 of the 12,000 features), the area value is bogus (incorrect by about 3 orders of magnitude).</p>
