

QGIS Application - Bug report #14103

Application crash on Categorized classification without a column specified

2016-01-14 07:56 AM - Dennis Bauszus

Status:	Closed	
Priority:	Normal	
Assignee:		
Category:		
Affected QGIS version:	2.12.0	Regression?: No
Operating System:		Easy fix?: No
Pull Request or Patch supplied:	No	Resolution:
Crashes QGIS or corrupts data:	Yes	Copied to github as #: 22109
Description		
<p>Using QGIS 2.12.0 I regularly create themed layers with Categorized classifications. I use the circle symbol and a color ramp.</p> <p>The data is point geometry from a local PostGIS DB. This works fine. However when I forgot to set a column the QGIS application crashes out. A Crash dumped exception is displayed (see attachment).</p>
