

QGIS Application - Feature request #14112

Node tool enhancement : freehand mode (aka "click-click" mode)

2016-01-15 06:05 AM - Vincent Picavet

Status:	Closed	
Priority:	Normal	
Assignee:	Martin Dobias	
Category:	Digitising	
Pull Request or Patch supplied:	No	Resolution: fixed/implemented
Easy fix?:	No	Copied to github as #: 22116
Description		
<p>The current node displacement tool works with a drag & drop behaviour.</p> <p>This issue propose to transform this behaviour into a freehand mode : click to get the node, move the mouse and click to "drop" it.</p> <p>Advantages would be the following:</p> <ul style="list-style-type: none">- improved snapping capabilities- use of the keyboard while editing- integration with advanced digitizing (CAD)- possibility of canceling current operation with right click- avoid unwanted move (sometimes a click on the map led to an unwanted node move) <p>Discussions on the mailing list :</p> <p>https://lists.osgeo.org/pipermail/qgis-developer/2016-January/040962.html</p>		

History

#1 - 2017-05-01 12:46 AM - Giovanni Manghi

- Easy fix? set to No

#2 - 2017-05-06 11:07 PM - Regis Haubourg

- Resolution set to fixed/implemented

- Status changed from Open to Closed

- Description updated

Seems done :)
