

QGIS Application - Bug report #1412

Attribute table editing

2008-11-18 03:04 PM - mikee -

<b>Status:</b>	Closed	
<b>Priority:</b>	Low	
<b>Assignee:</b>	nobody -	
<b>Category:</b>	Vectors	
<b>Affected QGIS version:</b>		<b>Regression?:</b> No
<b>Operating System:</b>	Fedora	<b>Easy fix?:</b> No
<b>Pull Request or Patch supplied:</b>		<b>Resolution:</b> duplicate
<b>Crashes QGIS or corrupts data:</b>		<b>Copied to github as #:</b> 11472
<b>Description</b>		
<p>On editing the attribute table and then reopening the table twice again results in only seeing one line, usually the edited line. Closing and re-opening restores normal behaviour.</p> <p>Sometimes not asked to save edits in which case re-opening once results in only display on one line. However this only happens if you don't click outside the edited attribute but click the close button instead. Clicking the next line, say, results in the above behaviour.</p>		

History

#1 - 2008-11-18 11:55 PM - Jürgen Fischer

- Resolution set to duplicate
- Status changed from Open to Closed

the attribute table currently shows only the selected features. This is probably what you're seeing. If so, this is a duplicate of #1306. Feel free to reopen, if it isn't.

In that case I'll quote from that bug (1305)

"I still have problems with this: once the table with selected elements is shown, how can a user select all the rows? Apparently pressing the first button has no effect"

This seems odd and unwanted behaviour to me.
