

QGIS Application - Feature request #14128

Allow record editing also from form view

2016-01-18 06:12 AM - Paolo Cavallini

Status:	Rejected	Resolution: Copied to github as #: 22130
Priority:	Normal	
Assignee:		
Category:	Attribute table	
Pull Request or Patch supplied:		
Easy fix?:	No	
Description		
Whew clicking on an object with the Info tool, a form can be opened. When using the table/form view, the user can put the layer in editing mode. It would be useful to add the button also when in single form mode.

- Status changed from Open to Rejected

On a second thought, this may clutter the interface too much, especially for bigger forms, so the disadvantages are bigger than the advantages.
