QGIS Application - Bug report #14144
Duplicate 2.5D layer does not create a 2.5D layer

2016-01-20 06:55 AM - Yves Jacolin

Status:	Closed		
Priority:	Normal		
Assignee:	Matthias Kuhn		
Category:	Symbology		
Affected QGIS version:	master	**Regression?:**	No
Operating System:		**Easy fix?:**	No
Pull Request or Patch supplied:	No	**Resolution:**	
Crashes QGIS or corrupts data:	No	**Copied to github as #:**	22146

Description

- create a 2.5D layer in the style tab
- duplicate layer

You should get a full 2.5 D style layer, but half of the style seems to be duplicate

Then, if you try to remove the 2.5D symbology (ie choose single symbol), you can't:

- remove the draw effect (disable draw effect, clic on the upper symbol layer and go back to "simple fill" symbol layer => Draw effect is enable)
- add a control feature rendering order (checkbox seems disabled)

Addressed after having seen this report ;)

Thank you for testing
