

QGIS Application - Feature request #14155

Composer Items Properties: Being able to change the height of some widgets

2016-01-21 09:27 AM - Harrissou Santanna

Status:	Open	Resolution: Copied to github as #: 22157
Priority:	Normal	
Assignee:		
Category:	GUI	
Pull Request or Patch supplied:		
Easy fix?:	No	
Description		
<p>It'd be nice if in some composer items properties, the height of some widget can be resized. This concerns:</p> <ul style="list-style-type: none">- Legend items frame- Variable frame <p>According to the number of layers listed in the legend or the number of variables defines (and considering that the number of already added variables grows from day to day), being able to resize the height of these frames will easier the UX (instead of scrolling scrolling scrolling)</p>
