

QGIS Application - Bug report #14158

regression: default "save as" value for ESPR Shapefile prevents creation of .shp

2016-01-21 07:33 PM - Mathieu Pellerin - nIRV

Status:	Closed	
Priority:	Severe/Regression	
Assignee:		
Category:	Unknown	
Affected QGIS version:	master	Regression?: No
Operating System:		Easy fix?: No
Pull Request or Patch supplied:	No	Resolution:
Crashes QGIS or corrupts data:	No	Copied to github as #: 22160
Description		
<p>Currently under master, the save as dialog sets the SHPT layer option to NULL for the ESPR Shapefile driver. This translates into the creation of a .dbf-only dataset. In previous versions of QGIS, I'm pretty sure the SHPT option was not set, as I have many times in the past saved KML files as shapefiles without having to modify layer options.</p> <p>While it might be useful to expose the SHPT option, having "dbf-only" option set by default is not good (understatement of the week :)).</p> <p>I have no idea when this regressed.</p>

Revision 5512d544 - 2016-01-23 08:21 PM - Martin Dobias

Fix regression in vector "save as" that saved shapefiles as .dbf only (fixes #14158)

History

#1 - 2016-01-21 08:00 PM - Mathieu Pellerin - nIRV

One way to fix this is to remove the SHPT option altogether, since QGIS itself now allows to modify the geometry type.

#2 - 2016-01-23 11:29 AM - Martin Dobias

- Status changed from Open to Closed

Fixed in changeset commit:"5512d5443f40e4aa6c70ab63149c0dd03a77b308".
