

QGIS Application - Bug report #14181

Opacity bar inverted in legend background

2016-01-27 05:18 AM - James Duffy

Status:	Closed	
Priority:	Normal	
Assignee:		
Category:	Unknown	
Affected QGIS version:	master	Regression?: No
Operating System:		Easy fix?: No
Pull Request or Patch supplied:	No	Resolution:
Crashes QGIS or corrupts data:	No	Copied to github as #: 22183
Description		
<p>Within the print composer, when selecting the background of a legend item, the bar with the title opacity defaults at 100%. However, the background is 100% opaque with the selected colour and needs to be reduced to 0% to become fully transparent. This is the wrong way round. 100% opacity should be see-through.</p> <p>Using QGIS 2.12.3 on Windows 8.</p>
