

QGIS Application - Feature request #14201

Processing of zero values and empty fields during interpolation

2016-01-30 08:42 AM - Anatoliy Dunaev

Status:	Open	Resolution: Copied to github as #: 22203
Priority:	Normal	
Assignee:		
Category:	Python plugins	
Pull Request or Patch supplied:		
Easy fix?:	No	
Description		
<p>Hello!</p> <p>When user works with big arrays of data it is very often that some variables have zero or empty values. However in any interpolation scripts there is no way to exclude them from processing. It leads to misrepresentation of the data.</p>
