QGIS Application - Bug report #14208
DBManager don't use pgservice.conf

2016-02-01 05:23 AM - Yves Jacolin

Status:	Closed			
Priority:	Normal			
Assignee:				
Category:	DB Manager			
Affected QGIS version:	master	**Regression?:**	No	
Operating System:		**Easy fix?:**	No	
Pull Request or Patch supplied:	No	**Resolution:**	duplicate	
Crashes QGIS or corrupts data:	No	**Copied to github as #:**	22210	

Description

- create a .pg_service.conf file with a new connection
- add this connection in the postgresql provider
- check that add a postgis layer can connect to the new database via service configuration => OK
- open dbmanager and connect to the new database => NOH

Result:

- a popup ask for credential
- database name is the default name when user don't give it in the form (ie login)
- login is the default one when user don't give it in the form (ie username from the system)

Expected result: use of configuration from .pg_service.conf file
