

QGIS Application - Bug report #14230

"directyl" on the exposed page on qgis website

2016-02-04 02:43 AM - Mateusz Konieczny

Status:	Closed	
Priority:	Normal	
Assignee:		
Category:	Unknown	
Affected QGIS version:	master	Regression?: No
Operating System:		Easy fix?: No
Pull Request or Patch supplied:		Resolution: fixed/implemented
Crashes QGIS or corrupts data:		Copied to github as #: 22228
Description		
<p>http://www.qgis.org/en/site/getinvolved/governance/trademark/index.html linked from main page (http://www.qgis.org/en/site/) has "directyl" misspelling in ("Please routinely explain in your course that QGIS is free and open source software, and actively encourage anyone to contribute, directyl or indirectly, to the project").</p>

In case that this issue tracker is not a proper place to report this kind of bugs - it would be useful to note at <http://www.qgis.org/en/site/getinvolved/index.html> where issues with website should be reported.

#2 - 2016-02-04 07:05 AM - Harrissou Santanna

Hi,
fixed in <https://github.com/qgis/QGIS-Website/pull/312>
The issue tracker of qgis website is at <https://github.com/qgis/QGIS-Website/issues> and there's already a pending [pull request](#) to add informations about issue tracker.

Note that there's a direct link at the bottom of each page to help you reach the right page to fix the issues (you just need a GitHub account) or at least reach the issue report website.

Thanks for reporting.
