QGIS Application - Bug report #14252
Cannot Save or Edit Existing .Shp Files

2016-02-09 02:04 AM - Daniel Hart

Status:	Closed			
Priority:	Normal			
Assignee:				
Category:	Vectors			
Affected QGIS version:	2.12.2		**Regression?:**	No
Operating System:			**Easy fix?:**	No
Pull Request or Patch supplied:			**Resolution:**	not reproducable
Crashes QGIS or corrupts data:			**Copied to github as #:**	22248

Description

I'm having a problem doing any of the following

- Saving edits to existing .shp files
- Converting other file types to .shp files

All other conversions appear to be working fine, but I am unable to save anything as a shape file. I have tried this on multiple versions (2.8.6 and 2.12.3, both 32 and 64 bit installs). I'm working on a 64bit Windows 7 machine.

Below is an example of the returned error (in this case a conversion, though the same error displays for edits):

Export to vector file failed.
Error: Feature write errors:
Feature creation error (OGR error: Error in psSHP->sHooks.FSeek() while writing object to .shp file.)

Is your file readable by any chance?

#2 - 2016-02-09 01:45 PM - Giovanni Manghi

- Category set to Vectors

seems much like a local issue... please remove/disable any 3rd party plugin and try again. If still fail try also another system, to exclude local issues completely. Thanks.

Can you provide a test shapefile that fails to you so we can check? Very difficult without an actual case to review
