

QGIS Application - Bug report #1426

Digitizer allows island creation with no poly selected

2008-11-25 05:01 AM - barryrowlingson -

Status:	Closed	
Priority:	Low	
Assignee:	nobody -	
Category:	Digitising	
Affected QGIS version:		Regression?: No
Operating System:	All	Easy fix?: No
Pull Request or Patch supplied:		Resolution: fixed
Crashes QGIS or corrupts data:		Copied to github as #: 11486
Description		
<p>If you select 'add island', and don't have a feature selected, you can create an island (which might take some time if you have a detailed island) and then right-click to finish only to get an error because you forgot to select a feature before you started.</p> <p>Hence loss of work, and hair.</p> <p>Island creation tool should either be disabled if no features selected, or check at the start instead of the end!</p>
