QGIS Application - Bug report #14281
Embedding layers does not work

2016-02-11 03:34 AM - Sebastian Dietrich

Status:	Closed			
Priority:	Severe/Regression			
Assignee:	Hugo Mercier			
Category:	Project Loading/Saving			
Affected QGIS version:	master	**Regression?:**	No	
Operating System:		**Easy fix?:**	No	
Pull Request or Patch supplied:	No	**Resolution:**		
Crashes QGIS or corrupts data:	No	**Copied to github as #:**	22275	

Description

When embedding a simple layer from a project, I can select the layer I want to embed, but it does not show up in the legend or the canvas. There is no error message either.

This is a **regression**, since it worked in 2.12
Reproduce:
  - Create new project
  - Create a memory layer
  - Save the project as TestForEmbedding.qgs
  - Create new project
  - Embed the layer from TestForEmbedding.qgs
  - Result
    - Expected: The (empty) layer is shown in the legend
    - Actual: Nothing

I attached a sample project so you can skip the first three steps.

- Assignee set to hartmut-tschauner-gmail-com -

Thanks, I'll try to have a look soon

#3 - 2016-02-11 08:11 AM - Sebastian Dietrich

- Assignee changed from hartmut-tschauner-gmail-com - to Hugo Mercier

@Hugo Mercier

Good. I think you mistakenly assigned somebody else here and re-assigned the issue to you. If that is not correct, please let me know or re-assign it again.

#4 - 2016-02-12 12:32 AM - Hugo Mercier

- Status changed from Open to Closed

Fixed in changeset commit:"6bbe3b93a22a310754f55f739c6cef8b1043a902".
