Description

Dear sir :

Sorrye, but the last version of Quantum GIS always crashes when running (under Mac OS-X Leopard 10.5.5).

Big regrets !

Yours sincerely,

What do you mean by "last version"? Any of those available at http://download.qgis.org/downloads.rhtml or built from source (what SVN revision if so)?

laurent01, could you please add more detail? Many OSX users are using QGIS, apparently without problems. Please test again with 1.0.1 and let us know.
