

QGIS Application - Bug report #14324

2.12 crashes on start up in Mac OS X 10.10 Yosemite

2016-02-17 01:41 PM - Rose Dawson

Status:	Closed	
Priority:	Normal	
Assignee:		
Category:	Unknown	
Affected QGIS version:	2.12.0	Regression?: No
Operating System:		Easy fix?: No
Pull Request or Patch supplied:	No	Resolution: invalid
Crashes QGIS or corrupts data:	Yes	Copied to github as #: 22312
Description		
After deleting 2.8 Wien, I installed 2.12, only to have it consistently crash on start up. See attached for screenshot of the crash log and below for the text. I've successfully run 2.8 in Yosemite and (unfortunately) assumed 2.12 would run just as well.

History

#1 - 2016-02-17 02:01 PM - Nyal Dawson

- Resolution set to invalid
- Status changed from Open to Closed

You also need to install the updated frameworks from <http://www.kyngchaos.com/software/ggis> .

The error is listed in the log - "Reason: Incompatible library version: QGIS requires version 11.0.0 or later, but PROJ provides version 10.0.0"

Grab the newer "GDAL Complete 1.11 framework package" and install that and you'll be fine.
