sorry...

the anomaly recurred in QGIS 2.14.4 and 2.16.

I fail to reproduce.

What happens ? Is there any error displayed ?

Could you share a test dataset ?

I'm guessing the reporter is running a Windows build - there seems to be a problem with accents only under Windows, eg the PyQgsVirtualLayerProvider test consistently fails:
<http://dash.orfeo-toolbox.org/testDetails.php?test=44799065&build=241189> (incomplete log unfortunately)

- *File essai.zip added*

see test dataset

with SQL : SELECT * FROM essai WHERE "STATUT" = 'Sous-préfecture'

#7 - 2016-11-10 12:45 AM - Hugo Mercier

That should be fixed now with #164a85acdb42f383b955c82c00f0ac2c0c5ad2ba

PyQgsVirtualLayerProvider is not part anymore of the list of failing tests on CDash
<https://dash.orfeo-toolbox.org/viewTest.php?onlyfailed&buildid=251261>

The fix has been backported to 2.18, 2.14 (and 2.16)
